

25 Ways to Improve Your Bone Health

| Get Enough Calcium and Vitamin D Every Day | 1. Try low-fat yogurt or Greek yogurt to add more calcium to your diet. |
|--|--|
| | Include green vegetables that have calcium in your recipes. Good choices are broccoli, bok choy, kale and turnip greens. |
| | 3. Try foods that have calcium and vitamin D added. Fortified juices, cereals, and milk alternatives like soymilk are some good choices. |
| | 4. Take a calcium supplement if you aren't getting enough calcium from foods, but don't take more calcium than you need. |
| | Take a vitamin D supplement if you need one. Find out how much vitamin D you need for your age. |
| Do Weight- Bearing and Muscle- Strengthening Exercises | 1. Take a brisk walk. Walking is good for bones. |
| | 2. Include muscle-strengthening (resistance) exercises in your workout by using a pair of light dumbbells or resistance bands. |
| | 3. Join a gym or sign up for a group exercise class. |
| | 4. Go dancing. |
| | 5. Try a new sport or activity such as tennis or hiking. |
| Keep Healthy Lifestyle Behaviors | 1. Eat five or more fruits and vegetables every day. |
| | 2. If you smoke, quit! Work with your healthcare provider to find the right program for you. |
| | 3. Keep alcohol to less than three drinks a day. |
| | 4. Try not to eat too many salty or processed foods. |
| | 5. Learn about your personal risk factors for osteoporosis. |
| Talk to Your Doctor About Your Bone Health | Make an appointment with your family doctor or other healthcare provider to talk about your bone health. |
| | 2. Bring a list of your bone health questions to your appointment and take notes. |
| | 3. Ask your healthcare provider if you need a bone density test. |
| | 4. Ask your healthcare provider about other tests you may need. |
| | Work together with your healthcare provider to develop a plan to protect your bones. |
| Improve Your Balance and Prevent Falls | Do balance training exercises. |
| | 2. Fall proof your home. |
| | 3. Take a Tai Chi class. |
