

For 40 years, BHOF has provided educational programs that respond to the needs, interests, and preferred learning styles of people seeking to learn how to prevent and manage osteoporosis and to protect their ability to live their best life. Live and on-demand webinars, downloadable publications and fact sheets, podcasts, an online support community, and a patient care pathway tool are among the many resources available free to the public at [www.bonehealthandosteoporosis.org](http://www.bonehealthandosteoporosis.org).

## IMPROVING LIVES THROUGH EDUCATIONAL SUPPORT

- ✔ Over the past year, BHOF has greatly expanded its reach with signature program webinars that attract more than 1,000 people per session.
- ✔ The webinars are recorded as enduring material to share with registrants unable to attend the live session.
- ✔ These dynamic programs, developed in collaboration with scientific and medical experts, include the latest research and information people need to be informed and remain motivated to make decisions that support their bone health and/or manage their osteoporosis.
- ✔ Hosted by BHOF staff and presented by experienced educators, the webinars are easy to understand, include downloadable handouts, offer a Q & A period encouraging active dialogue, and provide interactive components including polls along with pre- and post-surveys integrated into the live presentation format.
- ✔ BHOF's podcast, Bone Talk, features inspiring conversations. We examine issues around osteoporosis from diverse perspectives including patients, healthcare providers, care partners, policy makers, researchers, advocates, and innovators.

In commemoration of our 40th anniversary, we have launched an audacious campaign to raise \$400,000 in 2024. If you're interested in supporting BHOF's Educational Programs, below are examples of the impact your donation can have:

**\$40** ←

Supports recording and editing of a webinar to make it available on-demand.

**\$400** ←

Supports the cost of producing and distributing a podcast on an educational topic.

**\$4000** ←

Covers the cost for creating and promoting one webinar in collaboration with scientific/medical faculty.

BHOF cannot provide these programs and resources without the generous support of individual donors. We offer all of these programs at no cost.
