Join the Bone Health & Osteoporosis Foundation (BHOF) in raising awareness about bone health and osteoporosis during Osteoporosis Awareness and Prevention Month in May!

Osteoporosis is a common condition that affects millions of people worldwide. In fact, approximately 54 million Americans have low bone density or osteoporosis. It is a progressive disease that weakens bones, making them more fragile and susceptible to fractures. Osteoporosis Awareness and Prevention Month is observed every May to educate people about bone health and the importance of taking preventative measures.

This toolkit provides a collection of social media posts and graphics that you can use to help raise awareness. By using these resources to spread the word about osteoporosis, we can help prevent this disease from taking a toll on people's lives. Let’s work together to promote good bone health and prevent serious broken bones!

Click here to visit the Osteoporosis Awareness and Prevention Month page.

Help us spread the word!

Tag BHOF in your posts so we can share/amplify! 🌐🔗🔗

Facebook: @bonehealthandosteoporosisfoundation
